

# Company Profile

Established in 1987, **Force Equipment Service & Hire** is a leading earthmoving machinery contractor with offices throughout regional WA, Perth and Mackay in Queensland.

With a proven track record of more than 20 years service to the nation's dynamic resources, mining and construction industries, Force Equipment Service & Hire is the trusted name in earthmoving services, with fully equipped workshop facilities at Perth, Kalgoorlie-Boulder, Port Hedland, Geraldton and Mackay.

Our services include wet and dry hire earthmoving machinery, sales of quality low hour, late model earthmoving equipment, on-site repairs at many major resource and construction projects throughout WA and North Queensland, and all manner of machinery maintenance including welding and fabrication, industrial spray painting and sand-blasting.

Our team of qualified plant mechanics and boilermakers perform major and minor equipment overhauls at our purpose-built facilities both locally and across the State. These regional offices and workshops allow us to provide fast, efficient on-site support and repairs to remote projects 24-hours a day.

This full-time, regional presence, together with a thriving Perth office and Queensland branch, means that any service we provide is not only backed by two decades of hands-on experience, a national support network and unwavering commitment to quality, but a 200-strong team of qualified support staff within close proximity to the nation's major resource mining centres.

Force Equipment Service & Hire also operates across all industries through its crane division offering expertise in commercial and residential construction, infrastructure projects, industrial plants and maintenance projects.

Force Equipment Service & Hire has over 20 years experience with proven capabilities, experience and facilities to meet the requirements of any earthmoving or mining project across the country.

**Force Equipment Service & Hire** provides a comprehensive range of services to resource and construction projects in WA and Qld including wet and dry hire of earthmoving machinery, equipment repairs and the full scope of industrial crane services.

#### **Earthmoving**

With a modern fleet of more than 100 fully-maintained machines, we are well equipped to handle any earthmoving project. Our quality machines are available for wet or dry hire at competitive rates for projects of any size. Our operators are certified and experienced.

#### **Workshop Facilities**

In addition to bulk earthworks, crusher feed contracts and machinery hire we also offer full workshop facilities in Perth, Kalgoorlie-Boulder, Port Hedland, Geraldton and Mackay. Managed by qualified Caterpillar-trained mechanics, these workshops provide minor maintenance servicing and repairs to major rebuilds and component overhauls.

#### **Boilermaker Services**

We operate boilermaking facilities at every company workshop fitted with the latest heavy duty fabrication and manufacturing equipment. Our fully qualified boilermakers carry out various fabrication and repair work, including major structural repairs and modifications on Komatsu, Caterpillar, Terex, Hitachi and O&K mining and earthmoving equipment.

#### **On-site Support**

Our fully-equipped mobile service units comprise mechanical, electrical and welding personnel available to complete work at any site throughout WA or Qld at short notice.

#### **Sandblast & Paint**

We offer full machine refurbishment services in Perth and Kalgoorlie from minor paint touch-ups to complete machine sand blasting and painting.

#### **Quarantine**

As an approved Quarantine Clearance Facility operating in accordance with the Federal Quarantine Act 1908 and related legislation, we offer professional quarantine and weed/seed clearance services for imported machinery.

#### **Cranes**

Our Crane Division complements our broad range of hire services, comprising a fleet of 15 cranes and a team of experienced operators capable of managing any construction or infrastructure project, industrial plants or engineering and maintenance projects.

# A Dedicated Team

**The strength and success** of our business is directly attributable to the quality of our employees whose collective skills and experience have been a key driver in the Company's growth over the past two decades.

Our team comprises more than 200 employees with a core group of qualified tradespeople including Heavy Duty Fitters, Servicemen, Boilermakers, Industrial Spray Painters and Sandblasters. Our administrative team offers efficient and friendly support, which in conjunction with our highly competent trade team, provides clients with fast, efficient service second to none.

Our team is our competitive edge. We recruit the best tradespeople available and work hard to keep them.

As an equal opportunity employer, we offer our employees competitive remuneration and a range of benefits including access to health programs, career advancement, training opportunities and the option of transfer between divisions. We also support skill development for the future and offer apprenticeships on a yearly basis.

We are committed to workplace safety and take a proactive approach towards employee welfare through a comprehensive Safety Management System which includes:

- A Safety Management Plan
- Hazard Control
- Accident and Loss Control
- Emergency Control
- Inductions and Training
- Environmental Monitoring
- Continuous Improvement

In order to help maintain a fit and productive workforce we have implemented a company health program to assist employees and their families in achieving good health through a combination of initiatives including:

- Individual Health Risk Assessments and Monthly Seminars
- Tailored Healthy Living Programs and three Challenges over 12 months focused on healthy eating, physical activity and stress management
- A Smoke Free program
- Discounts on private health cover and involvement in community events
