Email: rmowarin@bigpond.net.au

The company has been in operation since the middle of 2007 and has quickly developed a reputation for the reliability and quality of the service it provides.

Since the commencement of its operations, the company has provided services to resource sector projects throughout the Pilbara on a 'wet hire' and 'dry hire' basis. The company has been fully engaged on projects at Cape Lambert, Karratha and Pannawonica since it was established.

Currently the company operates in the Pilbara region only, but has in place a business plan which will extend its operations into the state's Gascoyne and Mid-West regions.

Mowarin Contracting Pty Ltd is well placed to operate as a sub-contractor to bigger companies on major resource sector projects and to support these companies with Aboriginal employment and participation activities.

It is the mission of Mowarin Contracting Pty Ltd to:

- Provide dust suppression, water carting and crane hire services from an Aboriginal owned and operated company in support of resource sector construction activities in the Pilbara, Gascoyne and Mid West regions of Western Australia.
- These services will satisfy resource sector quality and safety standards and be delivered as required, on time and at the right price.

Currently the company operates a single Sterling six wheel 13000 litre truck. Plans are in place to acquire additional trucks and to establish a crane hire service.
